

2 PIECE SYSTEM INSTALLATION

FRICION REDUCTION PILE SLEEVE

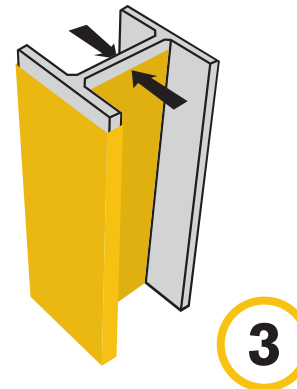

NOTE: For best results, install the units in lifts to coincide with the wall construction. Piling should be free of debris that may interfere with the jacket installation and performance.

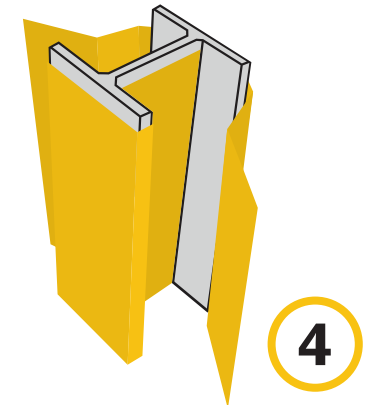

Center jacket on flange of pile.

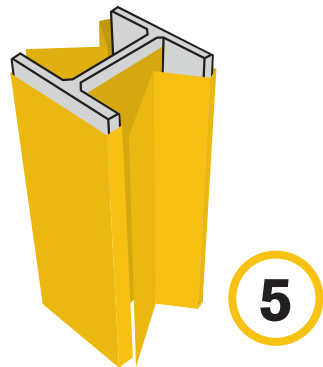

Square up edges of the jacket scored to accommodate each end of the flange (full length of jacket)

Push the web sections in to conform to the inside of the pile.

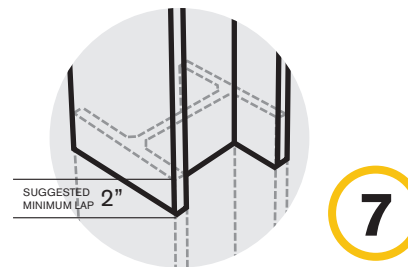

From the opposite side of the pile, repeat step one (1)

Repeat step two (2).

Repeat step three (3), overlapping the web sections of the jacket. Flaps will lock into position, completing the installation.

As each section is installed, lap as shown until the desired length of the pile is covered.
